DOE CSGF Policy for Departments Using Teaching Assistants
(TA Policy)

This policy is for departments that a) have students who have expressed interest in the Department of Energy Computational Science Graduate Fellowship (DOE CSGF), b) are under consideration as a fellowship applicant, and/or c) may already be a DOE CSGF recipient.

To be consistent with program goals, the DOE CSGF requires adherence to its TA policy. Fellowship applicants will only be considered for study in departments that verify one of the following:

1. Only one term of teaching, grading or other departmental support activity is required of the student in the applicant’s department, or
2. If there is a requirement to teach, grade or provide other departmental support for more than one term, this/these obligation(s) will be waived for DOE CSGF fellows.

If a DOE CSGF recipient teaches during the fellowship period, the program stipend will be reduced by the amount paid for the teaching or other departmental support activities.

Fellowship Benefits

The DOE CSGF fellowship provides the following:

- $38,000 annual stipend (renewable up to four years)
- Payment of full tuition, required fees, and student-only health insurance
- Annual $1,000 academic allowance
- 12-week research practicum
- Yearly program review participation

This fellowship is designed to identify and support some of the country’s very best graduate students, and it has a 30+ year track record of success in this academic pursuit. The DOE CSGF attracts a large number of highly qualified applicants annually due, in part, to the generous benefits that allow its fellows to devote full attention to coursework and research.

Policy Revision Date: February 16, 2022

Administration: The Department of Energy (DOE), Computational Science Graduate Fellowship (CSGF) is administered by the Krell Institute.

Contact Information: Questions can be directed to Lindsey Eilts, DOE CSGF Program Coordinator, csgf@krellinst.org.
