

2019 DOE NNSA SSGF & DOE NNSA LRGF Fellows' Poster Session

- Fellows' Poster Session – **Wednesday, June 26, 4:30-6:30 p.m.**
- Poster Setup – **You will have time to set your poster up on Wednesday, June 26 from 2:00-2:30 p.m.** There will be a sign with the SSGF or LRGF logo, your name, and your poster number on the board assigned to your display.
- You will share one side of the poster frame with another presenter, so plan your poster to be **smaller** than 4 foot by 4 foot (42 inches by 42 inches maximum).
- As a reminder, your professional, single-panel poster should pertain to fellowship-supported work.
- **You are required to staff your poster for an assigned time period.** The schedule will be available at a later date.
- Your poster should include the year (first, second or third) that corresponds with your time in the fellowship.

Helpful Tips to Prepare for Poster Session

- Do not assume that a poster you have used at a professional society or a group meeting will be effective at the SSGF/LRGF program review where attendees represent several areas of stewardship science.
- Organize your presentation to communicate a few significant points focusing on areas of mutual interest and expertise. Avoid discipline-specific acronyms.
- Understand the limitations of the presentation format. Graphics should be simple and easy to understand.
- In order to attract viewers, poster titles need to be legible from four feet away.
- Posters should include your ideas in outline form and entice the visitor to engage in conversation.
- Organize your material in columns so that people do not have to go from side to side to read the poster.
- Be sure that you are available to discuss your work. Check the poster session time to see when you are to be "presenting."
- Business cards are a great tool for making connections. You should have some on hand to distribute and also plan to collect cards from interested visitors.
- Everyone who stops by your poster should be greeted and offered the opportunity to ask a question or two. Extended and detailed technical discussions should be scheduled for another time and a different venue.
